Dear Mr Dean

Clackmannanshire Council's Core Path Plan

I refer to our previous correspondence on this matter and would like to re-iterate that core path 119 passes through the curtilage and privacy of our farm buildings. This path is not a right of way as we have created this path in the last few years. This core path is not useful in terms of bio-security of our rare breed livestock, or the security of our building and animals, particularly in light of the recent instances of vandalism, theft, usage of illegal motorbikes and poachers on our premises.

We would suggest that the path is diverted to the picnic site area, meeting core path 120.

Yours sincerely
