Route Details
 Start: Muckhart Coronation Hall
Route 1: Easy
 2 miles
Route 2: Moderate
 4.2 miles, undulating terrain can be muddy through cattle fields and farmyards.

biodiversity

Frogs

Amphibians may be seen or heard throughout the walk. Frogs have a moist, smooth skin, lay their spawn in clumps and can hop a distance of over six times their body length. Toads have a warty skin, lay their eggs in strings and hop or crawl along the ground. Throughout the UK many wetlands have been lost to development pressures, you can help by creating a wetland or pond in your garden.

Common lizards have been recorded in this part of Clackmannanshire. Look out for them from March to September basking on sunny rocks near hedges, forest edges and dry stonewalls.

Common Lizard

Ragged Robin

Ragged Robin is a pretty pink wildflower that grows on wet grassland.

While heading towards Muckhart Mill look out for buzzards, they are commonly seen around Blairhill.
