**THIS PAPER RELATES TO  
ITEM 11  
ON THE AGENDA**

**Motion Clackmannanshire Council  
Meeting 23<sup>rd</sup> June 2022**

The Council acknowledges that Scotland's pollinators are under threat. There are declines in honey bee populations in Europe and America and, although data for other wild pollinators, such as bumblebees and solitary bees, is not as complete, there are indications that many pollinators, not simply bees, are in decline and that it may be a global problem. It is therefore important that we take action now before it is too late to halt or reverse population losses.

Council is requested to agree to expand the remit of the Climate Change Forum agreed on 19 August 2021 to investigate and produce recommendations to Council on the following:

The creation of a Pollinator Strategy and long term plan to deal with the decline pollinators; and

Review the Council's local biodiversity action plan to include aims/objectives and actions which will help protect and enhance pollinator habitats and species.

It is also proposed that the Climate Change Forum is renamed as the Climate Change and Biodiversity Forum to reflect this amended remit.
